INTERNET & DATA LAB

The schedule

13:00 – Welcome to the Trustflows community

13:30 – Keynote Jan Lindquist on the EUDI and standardization on identity

14:00 – Panel: Is the EUDI a success or a missed opportunity?

14:30 – Coffee Break

15:00 – The 3 Trust Triggers use cases

16:30 – Network reception

How do you change your name?

An illustrative govtech use case

Processes anchor data in trust

My name is *Beatriz*
My name is *Jan*
My name is *Wouter*

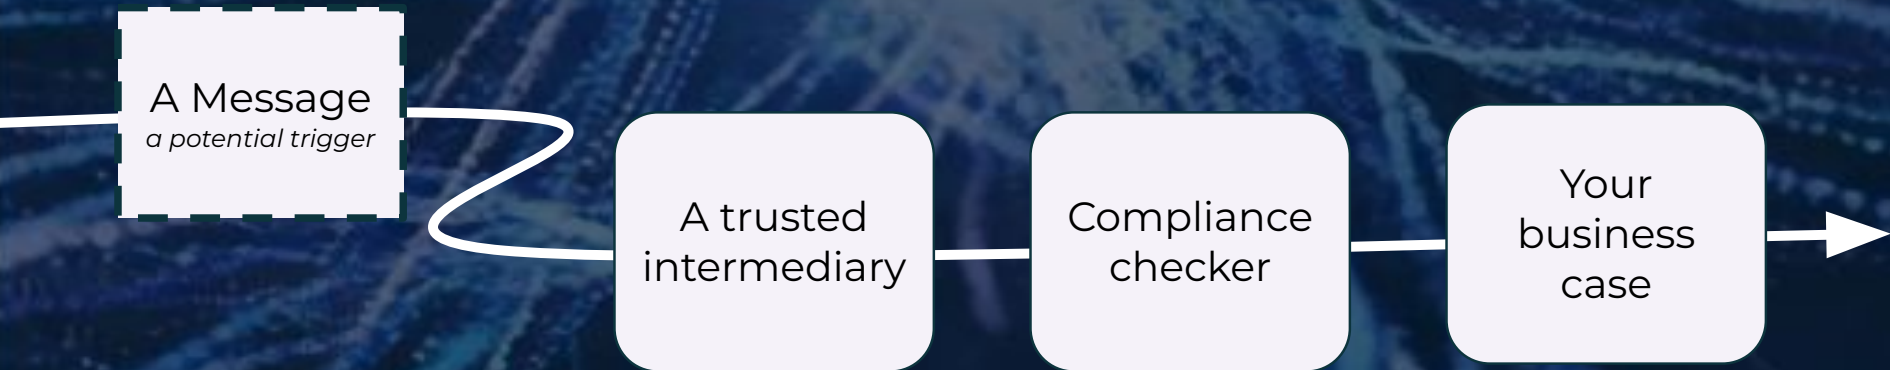

On the 20th of April 2026,
the authority <X> confirmed
the name of <#me> is "Pieter"

Why would you **trust** any of the above?

A trustworthy **trigger** for other views

Trust flows across organisations

A growing community waiting to apply this in reality

*Want your logo there?
Talk to me during the coffee break!*

The community gathers during **Trust Triggers** events

Connect with experts

We foresee long breaks so you can talk to everyone.

Talent pool

Get to know researchers who are ready to continue their career in industry or government.

Use cases

Find out about real industry or governmental use cases

The keynote

Learn from the keynote how EU Digital Identity and Wallets are evolving.

Consortium partners

Find a consortium for project calls.

Save the date:

14th of September **Trust Triggers #2**

In collaboration with the KG4DI network

Trustflows is centered around use cases

Bariatric care

Bariatric care entails long-term support on weight management and improving related health issues. For this purpose, we implemented a patient-centric data architecture using Solid-based personal data vaults. These vaults enable verifiable, privacy-preserving sharing of clinical, lifestyle, and sensor data for coordinated care, while ensuring regulatory compliance.

On-going

Partners: FAQIR Foundation, FAQIR Institute, [MoveUP](#), Bytefiles, AContrario, Ghent University - IDLab

2025-11

Tracking shipments (logistics)

Tracking shipments across multimodal supply chains often requires multiple platforms and fragile integrations. This use case explores how a logistics data space can provide end-to-end visibility with policy-based sharing and usage control.

On-going

Partners: [Imec](#), [University of Antwerp](#), [Vlerick Business School](#), [VIL T-Mining](#), [VUB Mobilise](#), [Plonira](#), [Inuits](#), [Van Moer Logistics](#)

2025-04

Selective sharing of accredited personal data in HR

A use case that explored secure, selective sharing of accredited personal data in a Solid ecosystem for HR workflows, combining policy checking, data minimization, and identity components with an end-to-end demonstrator.

Archived

Partners: TrustBuilder, Enhansa, DocByte, imec-mict-UGent, Athumi, Randstad Group, IDLab - UGent / imec, IDLab-TE

2025-02

A Trustflows use case

= a description of the real-world problem that's being solved

We document solutions without smoke and mirrors:

- Links to the vocabularies, schemas and interaction patterns used
- Includes the partners that are investing in it today

Use cases are actively funded, or funding is being requested

Broadening our scope from SolidLab to Trustflows

There's an ODI hackathon coming up (April 28–29)

Co-hosted with the 4th Solid Symposium (April 30th - May 1st 2026, London)

- Open to both experts and newbies
 - Citizen Data Track – ideal for newcomers, show what happens when apps and AI agents actually talk to each other on behalf of citizens.
 - Open Track – build whatever you want
- When:
 - April 27 (optional workshops)
 - April 28–29 (hackathon)
- Where: Birkbeck, University of London, Malet St, Room MAL-G16
- Free to attend ([sign up!](#))
- The winning team takes home a £1,000 prize

We're running our events
from Ghent!

Ghent is a great place to be at this moment it has a vibrant tech ecosystem

Region Ghent

Ghent is the technology capital of Belgium and a strong international climber: "The sector is booming"

The city states that the technology hub in the renovated Winter Circus plays a major role.

Ghent is the technology capital of Belgium and also scores very well internationally. This is evident from a new international annual report on the tech sector. "There is enormous dynamism, partly due to the Winter Circus," the city states.

The Brain

Wim De Wispelaere
IDLab – The Brain

The Brain – AI Tech Hub

Europe's Largest Dedicated Hub for AI Experts

20,000 m² – 15 story building

- AI companies and University offices
- State-of-the-art labs
- Community spaces

Up to 1,000 AI experts

- Industry partner AI R&D teams
- University researchers & students
- Fostering collaboration in a cutting-edge deep-tech environment.

The Brain Community

Unite industry and experts around AI Deep Tech

Frequent meetings - events

- Present state of the art of AI Deep Tech
- Inspire regarding AI implementations

For: Tech profiles: CTO, CIO, R&D/AI lead

Business network

- Where AI industry users and product developers meet AI experts and suppliers
- Facilitate Deep Tech AI collaboration and access to talent

First community event: May 28th, 2026

Trustflows means building
interoperably

Creating reusable specification assets

WHAT

Vocabularies
taxonomies / code lists / ...

↑ Documents reusable terms

HOW

Application profiles
schemas / shapes

↑ Documents attributes needed

WHY

Interaction patterns
protocols / business processes

Implementation guides
Developer / LLM documentation

The keynote of today:

“standards are where vision
becomes lasting reality”

Trustflows means automating legal compliance

This edition's curator

Dr. Beatriz Esteves,

Working on W3C ODRL and DPV

Leading the work on a “policy engine”

Together with Wouter Termont,
butchered analyzed the EU Digital Identity proposal

Trustflows means building all that
from the perspective of the end-user

But now,
it's time for our keynote:

Jan Lindquist!
